Ethical sourcing policy

Prescie

We want to promote the highest possible standards of Health & Safety, Environmental, and Ethical Working. We do this firstly within our own operations and secondly by working closely with our suppliers, all of whom are in the UK.

Our aims

Our aim is to promote excellent Health & Safety and Environmental practices as well as Ethical Working in all our operations and supply chain.

Our policy

- We ensure all our suppliers follow our policy by careful selection in the first instance and then by monitoring/auditing where appropriate.
- We will always take decisive and swift action should any of our suppliers fail to meet our requirements.
